For the past 300 years, musicians and scientists have puzzled over the unparalleled quality of classical Cremonese violins made by the Italian master Antonio Stradivari. These classical violins have become the benchmark against which the sound of all other violins is compared. There are many theories as to the “secret” of Stradivarius violins. What was obviously first explored was the exact size of the violins and ratio of the parts to each other. Although instrument makers have disassembled their violins, calibrated every dimension of the pieces to within the hundredth of an inch, and replicated the measurements perfectly in new instruments, they have failed to duplicate the Stradivarius magic. It is also well-known that the density of the material through which a sound propagates influences significantly the vibration efficiency of the material, therefore the tonal qualities of the instrument. It is also a widely held belief that Stradivari’s well-guarded varnish formula was not just a protective coating of the instrument, but actually the most important secret to his violins.

**61. It is stressed in the passage that ----.**

- A) the real secret to Stradivarius violins has later been revealed to be the varnish formula
- B) what actually makes Stradivarius violins unique is still a mystery
- C) the high quality of Stradivarius violins has only been successfully copied after 300 years
- D) the basic reason for the Stradivarius quality was the density of the material used
- E) if contemporary instrument makers were able to duplicate the exact ratio of the Stradivarius violin, they would produce its equal in the quality of sound

**62. We understand from the passage that ----.**

- A) Antonio Stradivari was distinguished as a skilful violin player
- B) Antonio Stradivari failed to achieve the quality of classical Cremonese violins
- C) the exact size of Stradivarius violins was reproduced only after 300 years
- D) it has been a professional challenge to understand the nature of Stradivarius violins
- E) some violin makers have claimed to have discovered the “secret” of Stradivarius violins

**63. It is clearly pointed out in the passage that the quality of Stradivarius violins ----.**

- A) has been measured according to the standards specified almost 300 years ago
- B) has only been equalled in very recent times
- C) is a criterion by which the quality of sound of all violins is measured
- D) is by no means a standard one
- E) is rarely appreciated except by those who play a violin

**64. According to the passage, there is a close relationship between ----.**

- A) the density of the material of a violin and the tonal quality
- B) the protective coating of a violin and the vibration efficiency
- C) the exact size of the violin and the instrument maker
- D) the value of a Stradivarius violin and the material it is made of
- E) Cremonese violins and all other violins

A company's public relations officer is responsible for creating and maintaining relationships between clients and customers. Through areas such as brand management, advertising, media relations and crisis management, public relations officers seek to foster interest, trust and belief in the company and its products. They are aware of how best to carry this out when dealing within their own nations and cultures. However, when dealing with a foreign audience, it is critical that cross-cultural differences are recognized. By way of illustrating the impact cross-cultural awareness can have on the success or failure of a public relations campaign, a brief example can be cited: an American company tried to sell its toothpaste in Southeast Asia by emphasizing that it "whitens your teeth". The Agta Negritos of the Philippines, a present-day tribal people, are an example of a culture whose women and men share all subsistence activities. Most interestingly, the Agta Negritos women hunt large game with bows, arrows, and hunting dogs. The women are prevented from hunting only during late pregnancy and the first few months after giving birth. Teenagers and women with older children are the most frequent hunters. The women space their children to allow for maximum mobility. They keep their birth rate down through the use of herbal contraceptives. By studying these ethnographic examples and by questioning the assumptions that have been made about female and male roles in prehistory, anthropologists have concluded that Western society's traditionally low view of women's status is by no means universal.

- E) male and female roles are completely separated

**70. The passage indicates that ----.**

- A) in the Agta tribes there is nothing more important than having children
- B) the Agta teenagers are brought up with Western values
- C) the Agta tribes keep to the prehistoric male and female roles
- D) the Agta people are aware of birth control
- E) the Agta women have learned how to use modern hunting tools

**71. It is understood from the passage that ----.**

- A) when a woman has advanced pregnancy, she has to give up her hunting activities
- B) the mothers are in control of the activities of their children
- C) women who give birth are expected to devote themselves to their children
- D) children can go hunting with their mothers even when they are babies
- E) anthropologists are very concerned about the Agta men's treatment of their women

**72. According to the passage, ----.**

- A) there is a great similarity between the Western and Agta perceptions of women's social status

Satellite images of the upper Amazon Basin in Brazil taken since 1999 have revealed hundreds of circles, squares, and other geometric shapes once hidden by the Amazon rain forests. They hint at a previously unknown ancient society that flourished in the Amazon. Now researchers estimate that nearly ten times as many such structures, of unknown purpose, may exist undetected under the Amazon forest cover. The discovery adds to evidence that the hinterlands of the Amazon once teemed with complex societies, which were largely wiped out by diseases brought to South America by European colonists in the 15<sup>th</sup> and 16<sup>th</sup> centuries. Since these vanished societies had gone unrecorded, earlier research had suggested that soils in the upper Amazon were too poor to support the extensive agriculture needed for such large, permanent settlements. The researchers say "We found that this view is wrong, and there is a lot more to discover in these places".

**73. According to the passage, the new discovery ----.**

- A) has strengthened the already known facts about the upper Amazon Basin
- B) is too poor to become an evidence for the ancient Amazon society
- C) has proved that the satellite pictures were misleading
- D) has falsified the previous assumptions about the land
- E) indicates the fact that the upper Amazon Basin was made of geometric shapes

**74. From the passage, we can infer that ----.**

- A) pictures taken by satellites can provide scientists with valuable new data
- B) there is no longer any reason to further investigate the upper Amazon Basin
- C) the ancient Amazon people lived in extreme isolation from the outer world
- D) researchers can learn a lot from the written historical data relating to the region
- E) the geometric shapes should not be taken too seriously

**75. It is clearly understood from the passage that the ancient Amazon people ----.**

- A) killed large numbers of would-be colonists
- B) had no resistance to new diseases
- C) hid themselves in the Amazon rain forest
- D) led a very simple life and lived as separate tribes
- E) are the ancestors of the present-day inhabitants of the region

**76. As can be understood from the passage, the researchers now tend to think that ----.**

- A) they have revealed almost everything about the region
- B) the natives had no idea about agriculture
- C) the colonists helped the natives become civilized
- D) the geometric shapes reveal something about the new industrial areas
- E) the land might have once been inhabited densely

Following the terrorist attacks of September 11, 2001, Americans understandably rallied around the flag. Having just suffered the deadliest attack ever on the US soil, a great majority of the people believed another attack was imminent. But Americans also had enormous faith the “Global War on Terror” would help keep them safe. Just one month after 9/11, for instance, 94 per cent of Americans fully approved of how the fight against terrorism was being handled. The United States then quickly went to war in Afghanistan, closing down a terrorist camp and capturing or killing a number of high-level al Qaeda operatives in the process. However, since 2001, terrorists have found their targets on almost every continent, with bombings in Bali, London, Madrid, Istanbul, and elsewhere. Now Americans appear less convinced that their country is winning the war on terror.
